```
krishnasree08@krishnasree08:~/ossp_session11_12$ cd ~/ossp_session11_12
nano multiple_pipes.c
krishnasree08@krishnasree08:~/ossp_session11_12$ gcc -Wall -Wextra multiple_
pipes.c -o multiple_pipes
./multiple_pipes
4
Multiple pipe execution completed.
krishnasree08@krishnasree08:~/ossp_session11_12$ mkdir -p ~/ossp_session13_1
4
cd ~/ossp_session13_14
nano input_redirection.c
krishnasree08@krishnasree08:~/ossp_session13_14$ echo "Hello from input redi
rection" > input.txt
echo "OSSP Session 13" >> input.txt
krishnasree08@krishnasree08:~/ossp_session13_14$ gcc -Wall -Wextra input_red
irection.c -o input_redirection
./input_redirection
Contents of input.txt:
Hello from input redirection
OSSP Session 13

Input redirection completed.
```

Result: The program successfully opens a file, redirects standard input using dup2(), reads the file contents, and displays them.
